## FOUNDER'S MESSAGE TO YOU OUR ESTEEMED CLIENT

“Over a decade as a doctor, I have noticed how medical concerns can be extremely distressing for patients and their relatives. Over the years, I have received calls from different people around the world asking opinions on the best treatment options or best clinicians available to address their individual health needs. The uncertainty of where to get the best help adds anxiety which complicates the burden of their current health concerns.

Recently, I faced the great burden of seeking a second opinion and best care there was available when my mother became suddenly ill. This was an extremely distressing experience which may have been easier if I

had an experienced concierge consultant sourcing the different opinions for me while I concentrated on looking after her. This experience made me realise that despite my wealth of medical knowledge, that the burden of seeking second opinions or the best care especially for one's self or loved ones can be quite daunting.

This service was born out of the drive to ensure that patients and family members are not burdened with the stress of phone calls or search engines but seek help from a one-stop shop comprising of the most experienced medical administrators and doctors who will seek the best options and opinions in different specialties and tailor it within your financial ability.

Although, we provide single fee services we also offer membership packages which ensure that you always have the service you have at a time that suits you best.

Relax and our team would ensure that your visit is smooth, comfortable and tailored to your individual needs.....”
